Data scientist with a software engineering foundation: production ML models on 1M+ customer records, AWS microservices with CI/CD, and LLM-powered analytics tooling adopted across teams.

Experience

JPMorgan Chase & Co. Jan 2026 – Present
Senior Data Scientist

- Built and deployed a propensity/classification model across 1M+ customer records to power marketing segmentation, replacing rule-based targeting for campaign planning.
- Built LLM-agent orchestrators accelerating migration of a legacy database spanning thousands of fields to Snowflake, automatically auditing ported vs. outstanding fields and generating scoped handoffs for engineering teams.
- Developed forecasts of incremental campaign impact to quantify marketing ROI and steer budget allocation across Sales, Product, and Marketing.
- Built dashboards and automated reporting adopted by 4+ teams across Sales, Marketing, and Product, replacing manual reporting cycles.
- Modernized team analytics workflows with Claude Code and GitHub Copilot, cutting a multi-day reporting task to hours and a multi-hour analysis to minutes.

Capital One Feb 2025 – Jan 2026
Associate Software Engineer

- Engineered secure Python ETL pipelines processing millions of rows/day, ingesting and transforming financial datasets into PostgreSQL and AWS S3.
- Built FastAPI self-service dashboards used by dozens of analysts, eliminating ad-hoc data-pull requests.
- Deployed microservices on AWS with CI/CD automation, cutting release cycles from roughly 4 hours to under 30 minutes while improving reliability.

BakerRipley May 2023 – Feb 2025
Data Analyst I → III

- Promoted from Data Analyst I to III in 13 months after scaling reporting support from one division to all seven at a Houston nonprofit serving over half a million Harris County residents annually.
- Built the agency’s Power BI executive reporting suite and automated data aggregation with Python and SQL, saving an estimated 8–12 hours per week while standardizing KPIs.
- Led the agency’s data analyst community of practice, running training programs that upskilled analysts across all divisions.

Combate Global, LLC Jun 2021 – Jan 2023
Analytics & Operations Coordinator / Intern

- Built executive Power BI dashboards combining Nielsen ratings, social metrics, and financials for shows reaching 500k+ viewers, and ran R-based sentiment analysis informing programming and partnership decisions.

Technical Skills

Languages & BI: Python, SQL, R, Power BI, Tableau, matplotlib
ML + AI: PyTorch, scikit-learn, LLM agents & RAG pipelines, prompt engineering, Claude Code, GitHub Copilot
Data + Infra: pandas, NumPy, FastAPI, PostgreSQL, Snowflake, AWS (S3, Lambda, ECS), Docker, CI/CD, Git

Education

M.S. in Data Science, The University of Texas at Austin May 2026
MBA in Business Analytics, The University of Texas Rio Grande Valley Aug 2022 – Aug 2023
B.A. in Sport Analytics, Rice University Aug 2019 – May 2022
